

Silver Fox

Your pocket companion, for the loud moments and the steady ones.

What it is

Silver Fox lives on your phone. When it gets loud inside, it walks you through one small step at a time, using the tools that already help you. When you're steady, it helps you grow: your book, your wins, and your next steps with the VA.

It learns as you use it. Each time, it asks a number from 0 to 10 before and after a step. The steps that bring your number down move to the top for you.

Get it on your phone (one time, about 5 minutes)

1. **Tap this link** in the email, on your phone:
<https://imjnathan-ops.github.io/silver-fox/>
2. It opens in your internet app. Silver Fox says hi and asks **six quick questions**, like who you'd call and what helps you. You can skip any of them, or tap **Set up later**.
3. **Put it on your home screen**, so it's one tap away:
 - If it opened in **Chrome**: tap the **three dots** : at the top right, then **Add to home screen**, then **Install**.
 - If it opened in **Samsung Internet**: tap the **three lines** ≡ at the bottom right, then **Add page to**, then **Home screen**.
4. Look for the **fox icon** on your home screen. That's Silver Fox. After the first time, it works even without internet.

How to use it

Open the fox and pick the one that fits **right now**:

- **Scared or overwhelmed.** The screen goes dark and quiet. Just tap **Next**, one step at a time. You don't have to think. If a step isn't working, tap **Try something else**. If you never want to see it again, tap **Not for me**.
- **The wall is going up.** That's the part of you that's trying to protect you. Silver Fox helps you step away first, then gives you one firm sentence to say instead of an explosion.
- **Steady.** Practice a calming step while it's easy, answer today's question, or work on your book. Steps work best when you've practiced them calm.

If you leave in the middle of a step, the next time you open Silver Fox it offers **Continue where you were**.

Underneath the three choices you'll find:

- **My safety plan.** Fill it in on a steady day: your warning signs, what helps, your people, and what you're living for. On a hard day, you only have to read it.
- **My story.** This week's small step, a 5 or 15 minute writing timer, and the road to Kindle, one step at a time.
- **My wins.** Write down what you did. Silver Fox adds some for you too, like when your number comes down.
- **My VA next step.** Write it down while it's fresh, so you don't have to remember it.

The buttons at the bottom are always there. Call your person, or reach the Veterans Crisis Line: dial **988**, then **press 1** when it answers, or text **838255**. You don't have to be sure it's an emergency. If you're in danger right now, call **911**.

Talking it through with Gemini

1. In Silver Fox, tap **Talk it through with Gemini**.
2. Tap **1. Copy for Gemini**. This copies how you're doing and what helps you.
3. Tap **2. Open Gemini**.
4. Press and hold in the message box, tap **Paste**, then send.

Now you can keep talking, and you don't have to explain everything from the start. Under **Choose what to share**, you decide what goes to Gemini. Private things are off unless you turn them on.

Changing things

Tap **More** at the top right, then **Settings**. From there you can:

- make the text **Bigger**
- change your person's name or phone number
- bring back a step you put away
- **Add my own step** for something that helps you that isn't there yet, like "Hug my cat"

Gemini can help you write a new step. Paste this into Gemini:

Help me write a calming step for my Silver Fox app. It should be 3 to 5 short lines, one action per line, for when I'm [scared / angry / steady]. The thing that helps me is: _____.

Your answers about what helps you and what sets you off are under **More**, then **About me**. Change them any time.

Keep a copy (once a month)

Everything you put in Silver Fox stays **only on your phone**. Nobody else can see it. Only what you paste into Gemini goes to Google.

So once a month, tap **More**, then **Settings**, then **Save a copy to my phone**. If you ever get a new phone or something gets lost, tap **Bring back a saved copy** and pick that file.

If something goes wrong

- **I can't find it.** Tap the link in the email again, then do step 3 above.
- **I'm lost inside it.** Swipe back like you do in any app, or tap **Silver Fox** at the top to go home. The help buttons at the bottom never move.
- **My entries are gone.** More, then Settings, then **Bring back a saved copy**.

For anything else, ask Gemini: *"I'm using a page called Silver Fox on my Samsung phone and ____ happened. What should I tap?"*

Optional: make Silver Fox live inside Gemini too

This takes about 5 minutes on a computer, once. Ask someone to sit with you if you like. When you're done, Gemini answers as Silver Fox every time, without pasting.

1. On the computer, go to **gemini.google.com** and sign in with the same Google account as your phone.
2. On the left, click **Gems**, then **New Gem**.
3. Name it **Silver Fox**. Paste the instructions from the file **Silver Fox — Gem instructions** into the instructions box. Click **Save**.
4. On your phone, open the Gemini app, tap **Menu**, then **Gems**, then **Silver Fox**.

Google says Gems will turn into "skills" from November 2026 and will carry over by themselves. You don't need to do anything. [Google's help on Gems](#) · [About the change to skills](#) · [Chrome: add to home screen](#)

Silver Fox — keep this by your bed

When it's loud: open the fox and tap **Scared or overwhelmed**.

3-3-3: name 3 things you see, 3 things you can touch, and move 3 parts of your body.

Say: "I'm here. I'm safe. This will pass."

When the wall goes up: step away first. "I need a minute. I'll come back to this."

My person _____

Veterans Crisis Line Call 988, then press 1 · Text 838255

In danger right now Call 911

You don't have to be sure it's an emergency to call.
